

Ridgedrop™ – Dropper:

Aimed at the game-, cattle- and electrical fence industry, it is with great pride that I take this opportunity to introduce our proven product.

We manufacture a UNIQUE SOLID, HDPE (High Density Polyethylene) plastic dropper with a (*1) specific grip design for fencing; resulting in the "non-slip" of the fence wire as well as maintaining even wires spacing.

This unique dropper is flexible to be able to absorb high impact without breaking and return to its original position and not stay bended/break as example steel droppers do.

Winner of the 2013 and 2017

. SAPRO 100% Recyclate product Silver award.

The dropper:

- SABS tested (2.9kN); VERY STRONG but FLEXIBLE to be able to absorb impact.
- UV protected.
- High resistance against veldt fires.
- Ideal for electrical fences.
- Prominent ridges keep wires from slipping.
- Does not bend or become crooked due to sunlight/cold.
- Cannot snap.

Specifications:

- Form: Oval shape (20 x 16mm)
- Structure: solid with ridges.
- Weight: 200 gram per meter
- Flexibility: 0 to +80 degree Celsius. Do not break even if bended.
- UV protection; 20-30 years.
- Fire resistant properties.
- Excellent resistance (no attack) to acids.
- No electricity drainage (ideal for electrical fencing)
- Length: any required length.
- The factory is situated in Pretoria and delivery can be arranged.
- It lowers the erecting- and maintenance costs with an average of 60%.

- Price: R6.00/m + VAT.
